✉ bmruotsi@gmail.com

📍 Raleigh-Durham NC

RELEVANT EXPERIENCE

WellCom - The Iron Yard Capstone Project

- Built remote monitoring system for water wells in Ghana
- Hardware construction using Arduino UNO and FONA 800 GSM and peripherals for gathering data on well usage
- Django website for communication with hardware and presenting relevant data to users.

The Iron Yard - Web Development with Python/Django

📅 July 2016 - Sep 2016 📍 Durham NC

- The Iron Yard is a 12-week intensive programming course aimed at preparing students with the skills of a junior level software developer and training them in approaching and solving problems.
- Explored use of server-side frameworks, machine learning, data science, databases, APIs, and user interface frameworks

WORK EXPERIENCE

Chief Technician

Ontario Specialty Contracting - Green Machine

📅 May 2015 - June 2016 📍 Buffalo NY

Company Description

- Designed and constructed li-ion batteries for conversion of diesel equipment to all-electric machinery
- Organized multiple teams (welding, machine shop, mechanics) for completing tasks pertaining to single machines
- Used battery management systems to tune AC motor and battery for optimal operation
